

UNCLE SAM

Points the Way to

OPPORTUNITY

It is your opportunity!—the one great chance of a lifetime. If you let it pass now, it will never be yours again.

The Government offers for sale the houses of brick and stone construction, built to meet the tremendous demands of the War, at prices far below the actual cost of construction.

Built by the Government, planned by the leading experts of the country in house construction, these houses are harmoniously arranged in beautiful settings.

Homes at

GRASMERE AND MILL GREEN

These houses are built in attractive and varied types, mostly for one and two families, a few in group types, and will be sold according to law for a small amount down, and the balance in monthly payments.

In Grasmere and Mill Green are located that portion of the Government houses that are adapted to the home-seeker, and the number will be all too small for the many buyers who will be anxious to take advantage of the Government's remarkable offer.

Most of the houses are now occupied, and options have been extended to tenants with priority rights of purchase until November 14th. All of those unsold on that date will be offered to individual buyers in the order of application.

Sale Begins Monday, November 17

Prospective buyers are invited to inspect the houses at Grasmere and Mill Green prior to date set for sale and opportunity to inspect any type of house may be secured upon application at the Sales Office at either place. All sales will be made by application, and application forms are now ready at the office of the United States Housing Corporation, 303 First-Bridgeport Bank Building, or at either of the Sales Offices on the properties.

If you desire to buy one of these houses, don't wait for the day of sale—**ACT NOW!**
